WATTMONK

ABOUT WATTMONK

It all started in the year 2019 and as of today Wattmonk Technologies has grown to become “Your Everyday Solar Store”. With offices in Singapore, Dover, Delaware, USA, and Gurugram, India, we are on a mission to increase solar adoption in the world by supercharging solar installers.

Wattmonk is the brainchild of Ankit Sheoran who has been in the Solar industry for over a decade. Ventured as an enterprise that provides Design and Engineering services to rooftop and commercial PV Installers and developers, we have evolved into an establishment with over 380 skilled professionals offering a variety of turnkey solar services from Solar Site Assessment and Sales Proposal, PV Site Survey, PV Permit Packages for both Residential as well as Commercial PV Systems, PE Stamping, interconnection, and PTO applications - all under one roof.

Currently, we have a portfolio of 300 MW in 2022 alone in the United States, and as of today, we deliver 5000 permits every month.

OUR SERVICES:

Solar Sales Proposals : We deliver sales proposals and shade analyses in 2-hours*. Considering all physical obstructions, the proposal shows the overall solar savings for each project.

Plansets : 'Plansets' within 6 hours of request. Our database includes 2781 AHJs from 18 states with a cover sheet, single and three-line diagrams, roof plans, attachment details, and spec sheets.

Site Survey Application : It allows anyone to do a home survey on their own with highly interactive features which can automatically feed the same information into permit plans.

PE Electrical & Structural Review : AHJ & Utility-compliant electrical and structural reviews are performed by our PE Stamping partners for all residential and commercial solar projects within 24 hours.

Interconnection & PTO Application : Interconnection and PTO applications are handled by a dedicated team. Once the utility inspection has been approved, we connect with the utility for Permission To Operate (PTO) and take care of post-installation processes.

Our Clients and Projects:-

We serve as an extension of our clients' staff. Due to our uniqueness and our desire to be the best, we have branched out to be "Your Everyday Solar Store". With over 150 solar installers across the country, we have grown 300% year-over-year. Besides serving five out of ten solar installers in the US, Wattmonk benefits many small businesses through its technology and services.

Every project begins with a thorough understanding of the client's objectives. We provide a team of highly skilled and proficient experts to deliver projects on schedule. This is not achieved by chance, it is a systematic, proactive approach that combats issues and resolves them before they become more complex.

What makes us Unique:-

We are Technology Fuelled
We proudly leverage technology to add value to the solar ecosystem by minimizing errors and bringing accuracy and speed for our partners. With a strong technology team, we relentlessly innovate every day and find easier solutions for complex tasks.

Statistics Speak for us
We fuel 60MW of solar projects every month; have successfully worked on 40000+ residential projects in 2022 across all states. Wattmonk delivers over 3500+ Permit plans, 1500+ PE Structural and Electrical Reviews, 5000+ Sales Proposals, and 600+ PTO & Interconnection Applications every month.

We are the Solar Mall
Wattmonk is one of the solar services providers that fulfill all of its installers' needs, right from the point a homeowner says "Yes" to getting solar panels up on the roof. Our array of services covers Proposals, Site Surveys, Plansets, PE Structural and Electrical Reviews, and applications. With all under one roof, information auto-feed happens in a mere click-saving time, reducing errors, and bringing convenience.
